

# YOUR NEIGHBOR, YOUR ENERGY

2018 Annual Report

 **Shelby Energy Cooperative**

A Touchstone Energy® Cooperative 

## YOUR NEIGHBOR, YOUR ENERGY

Of all the rules, guidelines and standards that Shelby Energy Cooperative follows to serve our members with safe, reliable and affordable electricity, you will not find our most significant guiding principle in a manual or three-ring binder. Instead, the core of our purpose can be stated in just one simple rule, the Golden Rule.

“Love your neighbor as yourself,” we are often reminded. Which leads us to the question, “Who is my neighbor?” Shelby Energy Cooperative has the answer.

We are your neighbors.

Shelby Energy Cooperative is your neighbor in every sense of the word. We’re not only your neigh-

bor because you live in one of the ten counties we serve. We’re your neighbors because we share a common purpose and interest, to improve the quality of life in the place we call home. We are in a great position to serve our own home area, from Milton to Mt. Eden and throughout our territory, because we are a cooperative.

Cooperatives, by their very nature, are uniquely suited to understand their own local community. Shelby Energy Cooperative was built by, belongs to, and is led by people in this community.

What does this mean for you? This means that instead of decisions being

made with the concerns of out-of-town shareholders in mind, Shelby Energy Cooperative considers what those decisions and strategies mean for our local communities. We work with our energy provider, East Kentucky Power Cooperative, to keep rates low, attract business, create jobs and advocate for our local communities. We are not only working for ourselves, but so our children and grandchildren see this area as an attractive place to live and raise their families.

That co-op spirit extends to a larger cooperative network in Kentucky and across America that works together on innovations and

efficiency. Like good neighbors, when disaster strikes, our fellow co-ops are ready to help.

### THE HELPING NATURE OF COOPERATIVES

Several times within this past year, Shelby Energy Cooperative has helped restore power to co-ops in Kentucky and in other states. Shelby Energy sent crews to Rappahannock, Virginia, in March 2018 to help after nearly 50,000 of their members lost power during a major windstorm.

Our top priority is service to you, our neighbors. Before committing resources to mutual aid

requests, we ensure we have ample crews available for all local needs, including routine maintenance and emergencies should they arise.

By helping our neighbors, we are helping ourselves. It's long hours in challenging conditions, but our line workers are wired to help people. Shelby Energy Cooperative is better prepared to respond to local power outages because of the assistance we provide our neighboring co-ops.

Our commitment to community also includes safety demonstrations for school and community groups, scholarships for college-bound students and Shelby Energy staff volunteering as active and involved community members.

### WE ARE PART OF THE COMMUNITIES WE SERVE

In partnership with *Kentucky Living* magazine and the Kentucky governor's office,

Shelby Energy Cooperative is proud to support the Beautify the Bluegrass initiative.

Shelby Energy volunteers removed old trees and shrubs, weeded, planted

flowers and put down new mulch at the Shelby County Annex building in Shelbyville.

Truly belonging to a community also means understanding the duty we have to each other. For Shelby Energy Cooperative to be able to safely and effectively serve you with on-demand energy, we need to maintain the electric grid. As a member of Kentucky Electric Cooperatives, we advocate for policies in Frankfort and Washington, D.C., that support our ability to provide the service you expect.

### OUR POWER PROVIDER

Shelby Energy Cooperative is an owner of East Kentucky Power Cooperative (EKPC), a not-for-profit, member-owned cooperative like us, that provides energy to 16 Kentucky electric co-ops. EKPC generates energy at power plants fueled by coal, natural gas, solar and landfill methane, and delivers it to over 2,800 miles of high-voltage transmission lines.

With Cooperative Solar, members of Shelby Energy Cooperative have an unprecedented option for affordable solar power. Cooperative Solar allows co-op members to license solar panels at Cooperative Solar Farm One, a 60-acre solar array owned by Kentucky's Touchstone Energy Cooperatives. You can harness the energy of the sun without the hassle, maintenance and expense of owning private solar panels.

Shelby Energy Cooperative is also edu-

cating members about the cost-saving benefits available with the use of electric vehicles

We are proud to be your energy, and we're even prouder to be your neighbor.

Noncurrent Liabilities .....	\$1,481,249
Other Current Liabilities .....	\$1,024,897
Total Liabilities .....	\$113,345,020

## ELECTRICITY REMAINS A GOOD VALUE

In today's world, costs are rising for nearly all consumer goods. For an average residential member of Shelby Energy, however, electricity cost per day remains a good value. At only **\$3.67 per day on average**, electricity costs are lower than the costs of many items that our members purchase every day.

*\* National averages. Residential electricity rate is for 2017, from the U.S. Energy Information Administration.*
